

## Simultaneous detection of **the main bacterial species from 7 different genera**

- ✓ DNA purified from serum
- ✓ DNA purified from biopsies
- ✓ DNA purified from blood
- ✓ DNA purified from cerebrospinal fluid
- ✓ DNA of arthropods carrying the bacteria of interest
- ✓ Samples of animal reservoirs

### Bacteria

Rickettsia

---

Rickettsia Typhus Group

---

Rickettsia Spotted Fever Group

---

Erhlichia

---

Anaplasma

---

Francisella

---

Bartonella

---

Borrelia

---

Coxiella

---
